OBJECTIVE

Fresh graduate with hands-on experience as an IT Assistant in the outsourcing services and IT industry. Skilled in system analysis, process flow design, web development, technical troubleshooting, and database management. Possessing a solid background in React, Laravel, Python, SQL, and Linux OS. I aim to support efficient system development and process improvement while continuously growing my analytical and technical skills in a professional environment.

EDUCATION

Universitas Negeri Jakarta

2021 – 2025

Bachelor's Degree in Physics, Specialization in Computational Physics

- **GPA:** 3.71/4.00

PROFESSIONAL EXPERIENCE

SG8 Group (Jakarta)

IT Assistant

Dec 2025 – Present

- Rebuild and enhance the company's main website using Laravel and React, including the development of interactive UI and CMS designs to ensure better system efficiency and operational alignment..
- Develop an e-commerce application using Laravel and React, integrating a payment gateway to digitize transaction processes and enhance payment efficiency.

PT Indomega Teknologi (Jakarta)

IT Assistant

Feb 2024 – June 2024

- Develop a web-based data visualization platform for air (GIS) and maritime (AIS) traffic monitoring using Python, JavaScript, and MongoDB.
- Performed data & system analysis on vessel monitoring performance across 4 months of maritime data to identify missing stamps data and provide statistical insights that strengthen monitoring strategies and support decision-making processes.

ORGANIZATIONAL EXPERIENCE

Physics Laboratory – Universitas Negeri Jakarta

Lecture & Laboratory Assistant

Sep 2023 – July 2025

- Facilitate learning for 30+ students enrolled in electronic, digital electronic and computational physics courses.
- Evaluate student performance and practical reports, utilizing Excel to assess understanding and progress, and offering constructive feedback to support academic growth.

Student Executive Board– Universitas Negeri Jakarta

Academic Development Staff

Mar 2022 – July 2023

- Orchestrated the execution of 10+ impactful academic programs designed to enhance student competencies.
- Made activity plans and reports for each academic programs to ensure organized documentation and project transparency.

PROJECTS

Corporate Website Revamp

Team Intern Project

2026

- Contributed to the full revamp of a corporate website, migrating from WordPress to a modern stack by building a responsive frontend with React and a RESTful API backend with Laravel, connected to a structured database.
- Developed a custom Content Management System (CMS) using Laravel, enabling non-technical staff to independently manage and update website content without developer intervention.

Volatile Compound Classification Platform

- Individual College Project2025
- Designed a custom gas chromatography device using Arduino Nano integrated with TCD and SGP30 sensors to collect volatile compound data, successfully capturing 80 samples across butane and methanol gases for model training.
 - Developed an ANN-based classification model with three input configurations (TCD-only, TVOC-only, and combined) to distinguish volatile compounds, achieving 95% accuracy and precision.

Air & Maritime Traffic Monitoring Platform

- Individual Intern Project2024
- Built an AIS receiver to collect real-time vessel data around Tanjung Priok Port and decoded aircraft trajectory data from WGS84 format, processing both into CSV using Python and visualizing live traffic using JavaScript.
 - Web platform can rendering 120+ vessels and 5+ aircraft routes, supporting comprehensive air and maritime traffic monitoring.

Delivery Time Accuracy Prediction

- Individual Intern Project2024
- Built a Random Forest model trained on shipping data to predict delivery durations, achieving 97% accuracy and precision, enabling more reliable estimated time of arrival (ETA) forecasts.
 - Deployed the prediction model through a web application built with Spring Boot and JavaScript, featuring an interactive dashboard for real-time delivery time visualization.

CERTIFICATES

- Intro to Software Engineering – RevoU2026
- Introduction SQL – Dicoding2025
- Associate Data Scientist – BNSP2025
- Java & Python For Data Science – MSIB2024
- Data Analytics Training – XQ plus2023

SKILL & PROFICIENCY

- Soft Skills:** Teamwork, Adaptive, Communication, Time Management, Problem Solving, Analytical
- Hard Skills:**
 - Languages :** Python, Java, JavaScript
 - Frameworks :** React, Laravel, Spring Boot
 - Tools & Others :** Linux, SQL, Figma, Git
- Languages:** Indonesian, English
